## **Guide Title: Glass Door Coolers - A Buyers Guide**

**Published: Sept 2009**

**Updated: June 2012**

### **BUYERS CHECKLIST**

#### **1. What is it made of?**

**Buyers Tip: Check the interior is made from enamel coated metal - Avoid plastic interiors which can crack and dis-colour**

#### **2. Check the Capacity!**

**Buyers Tip: Check the capacity, cheaper models can have much smaller capacities.**

*Avoid glass door units with 3 shelves - this makes the inside of the unit look more spacious and cheaper to make. Look for 4+ shelves.*

#### **3. Electronic Controller**

Look for double door units with Electronic Controllers (small black box on the front of the cooler with an LED temperature display). Electronic controllers deliver better performance. Avoid mechanical controllers (dial operated temperature usually inside the fridge).

**Buyers Tip: Buy double door units electronic controllers**

#### **4. Plate Evaporators / Skin Evaporators - which does the fridge have and what are they?**

Evaporators can be PLATE or SKIN type. The evaporator is the cooling system of any fridge.

- PLATE evaporators - cheap, less effective, prone to producing a excess water and icing problems.

- SKIN evaporators - more expensive, more effective, efficient and less likely to suffer from icing and faults.

**Buyers Tip: Check and go for units fitted with a Skin Evaporator.**

*How to tell? 1. Ask supplier. 2. Price, capacity and controller - cheap, low capacity, manual dial controllers are common with Plate evaporators.*

#### **5. FULL Warranty**

Many internet only suppliers provide 'PARTS ONLY' warranty. We just don't believe that's good enough! At Fridgeland we provide FULL PARTS AND LABOUR warranty for all of our A Grade equipment.

**Buyers Tip: Check the warranty - if it doesn't say Parts and Labour warranty, don't buy it!**

Information provided in this document are believed to be correct at the time of publication. No liability whatsoever for injury, damage or losses financial or otherwise resulting from its use can be accepted by the Company. Always consult with the appropriate authority for advice prior to purchase or use of any equipment.
